SKILLS

- **Languages:** Python (NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn), SQL, C++ (OOPS), C, Java
- **Core CS Skills:** Data Structures and Algorithms (DSA)
- **Tools/Platforms:** MySQL, VSCode, Anaconda Navigator, Power BI, Tableau, Excel, PowerPoint, Figma, Jupyter Notebook
- **Soft Skills:** Problem-Solving, Leadership, Team Management, Adaptability

PROJECTS

- **Migratory Bird Movement Analysis using Data Analytics** | [GitHub](#) Jan 2025 - Feb 2025
 - Analyzed multi-year migratory bird datasets with GPS latitude and longitude coordinates to identify geographic clustering and migration route patterns.
 - Conducted time-series and seasonal trend analysis to detect peak migration periods and continent-wise behavioral variations.
 - Applied statistical techniques including ANOVA, t-tests, and regression analysis to evaluate migration duration differences and extract data-driven ecological insights across continents.
- **Machine Learning & Data Analysis on Netflix Dataset (Python, Scikit-Learn)** | [GitHub](#) Oct 2024 - Nov 2024
 - Processed and engineered features from 16,000+ Netflix records, handling missing values, encoding categorical variables, and applying feature scaling for model readiness.
 - Built and optimized a Random Forest Regressor using train-test split and manual hyperparameter tuning to improve generalization and reduce overfitting.
 - Achieved strong predictive performance with high R^2 and low error metrics (MAE, RMSE), while identifying *vote_average* as the key driver of audience ratings through feature importance analysis.

TRAINING

- **Design Thinking Course (Figma)** | [Link](#) Jun 2025 - Jul 2025
 - Gained hands-on experience applying Design Thinking principles through user research, ideation, prototyping, and usability testing.
 - Learned to design parental control and child-safety features, including purchase restrictions, smart alerts, and ad-blocking mechanisms.

INTERNSHIP

- **J.P. Morgan Chase & Co. – Quantitative Research Virtual Internship (Forage)** Feb 2026
 - Applied statistical modeling and probability theory to solve real-world quantitative finance problems involving risk and uncertainty.
 - Performed data analysis and risk modeling tasks using Python to simulate financial scenarios.
 - Utilized hypothesis testing and likelihood estimation techniques to derive quantitative insights.

CERTIFICATES

- Bits and Bytes of Computer Networking (Coursera) | [Link](#) Jun 2025
- Data Analyst Certificate (WhiteHat Jr.) | [Link](#) Feb 2024
- APTAI Certificate (WhiteHat Jr.) | [Link](#) Feb 2024
- Coding Fundamental Certificate (WhiteHat Jr.) | [Link](#) Feb 2024
- Coding Master Certificate (WhiteHat Jr.) | [Link](#) Feb 2024

EXTRA-CURRICULAR ACTIVITIES

- Engaged in the Build-a-Thon Hackathon by Board Infinity, showcasing practical problem-solving and teamwork skills.
- Contributed to the Hack Quest - 24-Hour CTF Challenge organized by Lovely Professional University in collaboration with upGrad Campus

EDUCATION

- **Lovely Professional University** Phagwara, Punjab
Bachelor of Technology (Hons.) - Computer Science & Engineering | CGPA: 6.73 Aug 2023 - Present
- **Green Land Convent School** Ludhiana, Punjab
Intermediate | Percentage: 64 Apr2022-Mar 2023
- **Green Land Convent School** Ludhiana, Punjab
Matriculation | Percentage: 65 May 2020-Apr 2021
